Paris Agreement  
Emissions Targets  
Victorian State Policy and legislation  
Targets and energy policy  
The role of Local Governments  
Understanding risks to Local Government  
responsibilities, activities and programs  
Working with the State Government  
The work of Greenhouse Alliances

## **Session 2 (2 hours)**

### **Adapting to the changing climate**

Climate Change in Victoria, climate projections,  
and impacts  
Risk assessment, vulnerability assessment  
Dealing with the uncertainty  
Legislation  
Victorian Climate Action Act 2017  
Marine & Coastal Act 2018  
Planning & Environment Act 1987  
Adaptation Action Plans  
Regional Adaptation Strategies  
The Adaptation Pathways approach  
Where to go to for help and further information

## **Session 3 (2 hours)**

### **How to Put it all Together**

Greenhouse Gas emissions mitigation  
Energy  
VicGrid and the SEC  
Wind Energy  
Transition to a net-zero society  
Putting it all together  
Parks & Reserves, Roads & Streets, Waterways

Climate Change is potentially  
overwhelming - pervasive across  
virtually everything Local  
Governments are involved with.

These sessions provide a  
carefully curated overview,  
designed to break the issues  
down into chewable chunks and  
provide a framework for  
understanding the relevant  
impacts, legislation and policies.

### **Presenter –**

## **Rod Anderson**

*Until recently Rod was a Regional  
Manager for DEECA. He has  
extensive experience in  
environmental and ecosystem  
policy and programs, particularly  
integration of climate change into  
land and resource*

### **Enquiries and Registrations**
